DETAILED ACTION

Oath/Declaration

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not state that the person making the oath or declaration acknowledges the duty to disclose to the Office all information known to the person to be material to patentability as defined in 37 CFR 1.56.

The current statement acknowledging the duty to disclose uses improper language "material to the examination" rather the required language of "material to patentability" and refers to CFR Section 1.56(a) rather than 1.56 as required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2-3, 5, 7-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 2-3, 5, 7, there is no antecedent basis for "the region".

Regarding claims 8-9, there is no antecedent basis for "the one or more descaling systems".

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Fasoli et al '678. Fasoli discloses an installation and method where a furnace is provided between a casting machine and a rolling train in order to bring a slab to a desired temperature (col. 1, lines 12-17) such that descaling of the metal strip is conducted during its residence time in the furnace (through descalers (22a-22c). The limitation of a moving location for the descaling operation is read onto the different positioning of descalers (22a-22c), in other words the descaling is being carried in a moving location since the location varies/moves with each on the descalers. Limitations of claim 2 are read onto descaling operation carried out at descaler (22b) since it is in the middle of zone defined by (10b, 10c).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fasoli et al '678 in view of Coassin et al '165. Coassin is relied upon to teach that it is known to provide a continuous casting installation as the one in which the furnace of Fasoli is usable with a descaler upstream of a tunnel furnace (descalers 215 and 115) for the purpose of increasing the descaling efficiencies. Therefore it would have been obvious to one having ordinary skill in the art, at the time of the claimed invention, to have included a descaler upstream of the furnace in the installation of Fasoli for the purpose of increasing descaling efficiencies.

Allowable Subject Matter

Claims 4 and 6 are allowed.

Claims 5 and 7-9 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: a descaling system located in a furnace which is connected with moving devices to allow the system to move in the direction of conveyance is not disclosed or taught in the prior art.
